

We're excited to be launching our new  
**RECYCLING PROGRAM**

Kidseat Recyclers is the first recycling company in Alberta that will ensure your child's old car seat is properly disposed of with all the plastic being re-chipped and put back into the marketplace. No more filling up our landfills!!!

Now, all we need are your seats!!

Kidseat Recyclers will be holding periodic recycling depots to collect your unwanted seats. Please check our website [www.kidseatrecyclers.ca](http://www.kidseatrecyclers.ca) for dates and times of the depots, or simply contact us and we can provide you with more information.

Our program is a fantastic community service and we are happy to be offering this option for parents and families. The type of plastic that is being recycled does have a recycling levy of \$4 per seat, \$2 per base and we charge a minimal \$2 to strip the seats. (If you would like to strip them yourselves, we will waive the \$2 fee, but please keep in mind that they need to be completely free of all metal, material, etc.)
